## Transportation - Tips for Driving Yourself

1. If you are driving yourself, give yourself 10 extra minutes to park in case you have trouble finding a space, or have to park and walk a little ways to your interview location.
2. Take a practice drive a few days before the interview to make sure that you know the route and how long the ride takes. If you are driving yourself, find out where available parking is as part of your practice drive.
3. Remember that travel time to the interview might be longer at certain times of the day ("rush hour") than at other times – so if you are trying to get to an interview during rush hour, leave plenty of extra time.
4. In fact, do your practice drive at the same time of day as your interview so that you know how traffic will be at that time.
5. Remember money for parking fees.
